## **Testimony for Molent Aerostructure's armasuisse Aircraft Structural Integrity Familiarization course 23-27 March 2026**

To whom it may concern

It is my pleasure to recommend Loris Molent's (AM) Aircraft Structural Integrity Familiarization course/workshop which was recently conducted at RUAG Emmen Switzerland. The course was sponsored by armasuisse and was very successful. The course material covered Molent's 35 years of expert aircraft structural integrity (ASI) achievements for the Royal Australian Air Force as well as many other air forces etc.

The course was very informative and provided many practical and innovative solutions for many ASI issues. Molent was a consummate presenter and facilitator, energising the board audience of military staff, engineers and other professionals, and stimulated many questions from the audience. The ASI cases studies added many insights and were particularly pleasing to the audience.

The course covered a wide range of relevant topics – exactly what I wanted.

I can thoroughly recommend this course. You will, like the Swiss attendees, benefit greatly from Lorrie Molent's experience, research and practical solutions.

Yours Sincerely

Mirco Figliolino
